High Performance Packaging

Clean. Safe. Certified.

Plastic drums, pails and jars for high value materials industries

HIGH PERFORMANCE PACKAGING

Wide Neck Drums With screw lid

Water vapour and leak tight UN certified (1H2) for solids HDPE

Total Opening Drums With screw lid

17|26|34|39|55|64|75|90|110 litres Water vapour and leak tight UN certified (1H2) for solids HDPE

Conductive Drums With screw lid

3.6|6|10|15|20|26|75 litres Surface resistivity ≤ 1,000,000 Ohm Water vapour and leak tight UN certified (1H2) for solids Conductive HDPE (not food safe)

Click Pack Pails With screw lid

6|10|15|20|25 litres Open and close with a quarter-turn Water vapour tight UN certified (1H2) for solids HDPE

Fold Pack Pails With press-on lid 32 litres Water vapour tight

UN certified (3H2) for solids HDPE

Biobased Packo Jars With screw lid and innerseal or screw lid with integrated gasket ml

Open and close with a quarter-turn Water vapour tight UN certified (1H2) for solids Bio HDPE

2.9|3.6|5|6|10|15|20|26|42|55|68 litres

Recycled Wide Neck Drums With screw lid 2.9|3.6|5|6|10|15| 20|26|42|55 litres Water vapour and leak tight UN certified (1H2) for solids Recycled HDPE (not food safe)

Nestable Drums With screw lid

30|40|50|60|75|115|120|150 litres Water vapour and leak tight UN certified (1H2) for solids HDPE

UV Safe Drums

With screw lid 6|15|26|55 litres UV protection within the 200 – 400 nm range Water vapour and leak tight UN certified (1H2) for solids HDPE

Recycled Click Pack Pails

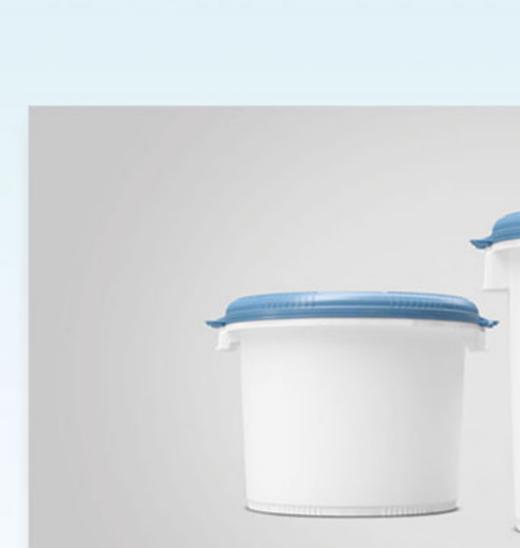

With screw lid 6|10|15|20 litres Open and close with just a quarter-turn Water vapour tight UN certified (1H2) for solids Recycled HDPE (not food safe)

Duo Pack Pails With insert and press-on lid 1.2|5|10 litres

For two-component materials Splash-water tight UN certified (1H2) for solids (except the 1.2 and 10 litres) PE

UV Safe Packo Jars With screw lid and innerseal or screw lid with integrated gasket

300|500|650|1000|1300 ml UV protection within the 200 – 400 nm range Open and close with a quarter-turn Water vapour tight UN certified (1H2) for solids HDPE

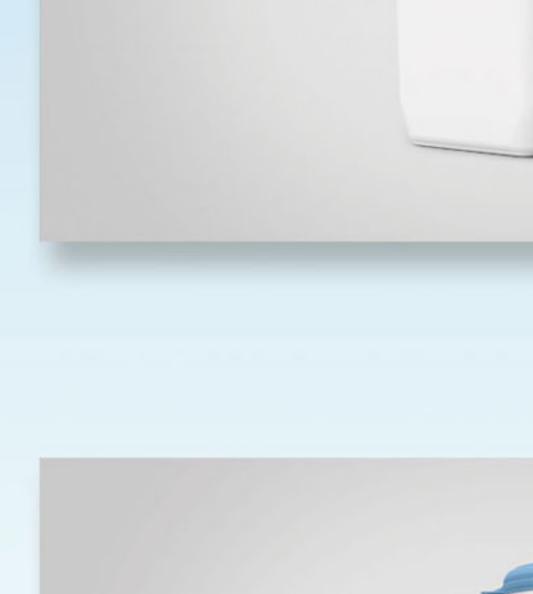

Biobased Wide Neck Drums With screw lid 2.9|3.6|5|6|10|15| 20|26 litres Water vapour and leak tight UN certified (1H2) for solids **Bio HDPE**

Square Drums

With screw lid 40|50|66|80 litres Water vapour and leak tight UN certified (1H2W) for solids HDPE

Rectangular Drums

With sliding lid 40 litres Water vapour tight UN certified (3H2) for solids HDPE

Press Pack Pails With screw lid 20|30 litres Press-on the lid to close, turn to open an re-close Water vapor and leak tight UN certified (1H2) for solids PP

Packo Jars With screw lid and innerseal or screw lid with integrated gasket 300 | 500 | 650 | 1000 | 1300 | 1500 | 2000 | 2500 ml Open and close with a quarter-turn Water vapour tight UN certified (1H2) for solids HDPE Lids available in 8 colours

Pharma Grade Packo Jars With screw lid and innerseal

300|500|650|1000|1300 ml Certified according to EU and US Pharmacopeia Open and close with a quarter-turn Water vapour tight UN certified (1H2) for solids HDPE

About High Performance Packaging

CurTec drums, pails and jars with their signature screw lid closure are designed to meet the highest industry demands with regard to safety, security and certification. Our distinctive packaging products are made from HDPE and manufactured to GMP standards of quality and cleanliness. They are moisture (vapour) and leak tight, tamper evident and UN certified for hazardous solids.

Benefits & features

The properties of CurTec packaging offer advantages that reduce supply chain costs and increase customer satisfaction:

- Shortening process time: screw, sliding and press-on lids can be operated safely and quickly
- Avoiding contamination: CurTec manufactures optically clean packaging
- Avoiding solid solution softening/ powder caking: mounted or integrated gaskets prevent moisture ingress
- Securing valuable content: sealing features reveal and prevent tampering
- Shipping hazmat safely: CurTec packaging is UN certified
- Guaranteeing food safety: CurTec packaging complies with FDA and FSSC standards
- Optimizing storage and shipment of empty packaging: nestable solutions take up less storage space
- Improving brand identity: CurTec packaging products have a distinctive design
- Lowering carbon footprint: plastic packaging can be re-used and easily recycled

CurTec is a GMP certified packaging company
