

## CASE STUDY

# 'Innovative bio chemicals require an innovative pack'

Bachem is a bio chemicals company servicing the pharmaceutical and biotech industry. Bachem is specialised in the process development and manufacturing of peptides and complex organic molecules as active pharmaceutical ingredients (APIs). In addition Bachem offers innovative bio chemicals for research purposes. Naturally they want to ensure that these high quality bio chemicals are stored and dispatched safely in accordance with their quality specifications. CurTec's Click Pack meets these requirements in a number of different respects.

Since CurTec's containers can be sealed tamper evident over and over again, Bachem can avoid repacking during and after manufacture in many cases. This has a positive effect on the supply chain cost.

Thanks to a high degree of stability, simple handling and simple opening and closing (only a quarter-turn), the container, compared to other variants, has established itself

## CASE STUDY: 'INNOVATIVE BIO CHEMICALS REQUIRE AN INNOVATIVE PACK'

quickly in the areas of production and storage, and has been heralded as the product that provides an all-round solution.

Products are packed in polyethylene bags and even when they are full, they can be inserted and removed without problems thanks to the large opening and smooth inside of the container. Used containers can be nested after cleaning which offers Bachem the benefit of saving storage space.

Another positive aspect is the impression Click Pack gives in quality audits by customers and authorities: it conveys a clean, orderly impression, as well as in customer shipments, where the customers not only receive a professional product but one that is professionally packed.
